

how we can *help*

Container Management Services LLC has been involved in drum and IBC recycling and disposal for over 90 years. It has developed a model in which quality, safety, sustainability and regulation are key components.

What we accept:

We accept certified triple rinsed containers, of all sizes, that once contained agricultural chemicals.

Pricing:

Please contact our sales team:
info@myerscontainer.com

Container collection:

Scheduled a drop-off or picked-up at your location (freight rates apply).

How to set it up:

Contact customer service to schedule a pick-up or drop-off of your containers:
1.800.406.9377 or
fill out our online collection form:
www.myerscontainer.com/collection.aspx

Why?

We recycle your containers responsibly following industry best practices.

*For more information about our procedures please contact
Quillyn Brown at
qbrown@myerscontainer.com*

Whether you are a grower, retailer or manufacturer, Container Management Services (CMS) can help you dispose of your agricultural chemical containers properly. Containers that once contained agricultural chemicals require special processing. CMS has developed a procedure that follows the standards set out in ANSI/AS-ABE S596, "Recycling Plastic Containers from Pesticides and Pesticide Related Products" to handle these containers responsibly and ensure the safety of the environment and our communities.

make a *difference*

Agricultural Chemicals: *Container Recycling*

We believe in minimizing our environmental impact. We have developed a culture that reduces waste streams, promotes recycling and reuse of its products (and the materials used in the manufacturing and reconditioning of its products).
