Prices to increase September 1, 2009

The historic downturn in the global economy has challenged us all in 2009. As we end summer the experts report that the inventory overhang has finally run its course and destocking has depleted raw materials from the supply chain. As a result, raw materials are now on the rise. As with every other company, our volumes are still dramatically reduced and even though we have attacked our fixed costs with a vengeance we are forced to amortize the remaining fixed costs over fewer units.

Be assured that Myers Container and Container Management Services are working hard to control our costs and with your help by allowing additional lead-time or reviewing specifications we will continue keep these unprecedented increases to a minimum.

Please contact your Account Manager, our Client Services Center at 800.406.9377 or visit our website at www.myerscontainer.com for additional details.

Sincerely,
James M. Bise, Jr.

Director of Sales
Myers Container/CMS
