

Myers/CMS, with locations in Portland, Oregon, and Hayward, California, is a recycling solutions provider that reconditions and recycles discarded materials. Our specialties are used plastics that most recyclers can't accept.

We offer an environmentally safe, secure, and cost-effective method for container and material recycling. By operating our own fleet of trucks, we can offer Truckload and LTL pickups quickly with low minimums at little or no costs to your Company. In some cases we can even provide drop trailers that can be switched out at your convenience.

Myers is interested in, but not limited to, the following products and materials:

*Myers/CMS accepts these products in almost any condition as long as they are empty. All Containers with **Hazardous** residues must be properly emptied, closed and MSDSs must be approved prior to pickup. All containers that previously contained non-hazardous materials should be empty, or with an approved MSDS we can arrange for material disposal at a reasonable cost to you.*

Please contact us if you have any questions about these or other recyclables you may generate. We are excited to work with customers in developing the most beneficial recycling solutions possible.
