EMPTY CONTAINER CERTIFICATE

I hereby certify that these container are empty as that term is defined in the Environmental Protection Agency Regulations, 40 CFR 261.7*, and that they have been properly prepared for transportation under the regulations of the U.S. Department of Transportation, 49 CFR 173.29**.

* With regard to most regulated residues, EPA's 40 CFR 261.7 states, (see regulation for exact language) A container is empty if:

(1) all wastes have been removed than can be removed using practices commonly employed to remove materials from that type of container, e.g. pouring, pumping, aspirating, and,

(2) no more than 2.5 centimeters (one inch) of residue in the bottom of the container or no more than 3% by weight of total capacity remains in the container.

Further, if I am notified that there is excess residue inside the container OR the container does not meet the Myers/CMS, LLC acceptance criteria, I hereby agree to initiate timely and appropriate shipping and shipping papers to return the container to the generating site, or agree to accept charges for the return of these containers.

** DOT's 49 CFR 173.29 states that all openings on the empty container must be closed, and that all markings and labels must be in place as if the container were full of its original contents. A DOT shipping paper is not required for transportation of any empty container for reconditioning via contract or private carrier. DOT placarding is not required for vehicles carrying empty containers.

For residue of products specifically specified in 40 CFR 261.31, 261.32, 261.33(e), the container is empty only if the container has been triple rinsed using a solvent capable of removing, or has been cleaned by another method shown capable of equivalent removal.
